

Hi, I'm Dale Peters. I started property investing in 2006, and I've been with the investing club for about five years.

## **How you get started with the Property Club?**

When I first started property investing, my wife and I bought three investment properties over a period of time and where we had our loans, the bank said that they weren't going to refinance those loans. I was lucky enough at the time to meet Phil Burns, who helped us resolve that issue by recommending a broker. That led us to join Property Club.

## **What are some of the benefits of property club?**

Now that we're in the Property Club, the benefits that we find is the workshops, learn how to do property investing on a professional level, but more importantly the friendships and trust that we have with each other to further your property investing.

## **What good does the Property Club's annual conference to an established investor?**

Being in Property Club has allowed us to get to six investment properties, but also probably another bonus of having a club to be a member of is that we've been able to bring immediate family into the club, where they have benefited from being in the club, and also close friends who have bought several investment properties.

## **How long have you known Kevin Young for?**

I met Kevin Young in about 2012, must have been 2013. At the particular time, my daughter was looking for a job. We met Kevin and just did a quick introductory, which didn't really go down that well, but now, in 2015, my daughter is working full-time in head office for Property Club.
